

Barcău river - Hodoş section, Bihor county
(47° 13'52.82942"N 21° 59'00.86264"E)

Proposed situation plan

Composed of:

- Crushed stone and ballast road for easier access from to dike to the litter trap;
- Reinforced concrete tank that supplements the volume of the collection box of the Litter Trap system ;
- Reinforced concrete platform that will ensure the maneuvering space of the machines during the collection of floats, loading and unloading the container and handling the loading machine;
- Litter Trap system which consists of a floating collecting box made of recycled plastic, fixed on pillars and two arms for diverting the floats to the collecting box.
